

Homework Jan-19: Draft R Script for Final Model

10 points total

By 9am on Friday, January 19, please upload an R script that includes an **annotated version of your model**, which will eventually be simulated to produce a plot embedded in your final term paper as a figure.

At this stage, your script does not need to be fully working yet; however, it should be clear from your annotations what you are attempting to do. If you need help with any part of the script, please note that in the annotations and highlight, where help might be most useful. We will try to get you feedback by Monday, Jan 22 to help you successfully complete your final model by Thursday of next week.

For this assignment, please follow the naming convention:

HW-Jan19-DraftModel_LastName_FirstName.R
